

## ISOLNOISE AE 3

THE HIGH DENSITY ELASTIC-RESILIENT PANEL MADE OF VULCANIZED AND PRESSED RUBBER GRANULES.

Ecological membrane for impact sound noises acoustic insulation made of a $750 \mathrm{~kg} / \mathrm{m}^{3}$ density mat made up of natural and synthetic elastomeric compounds, coming also from the recycling of ELT (end of life tyres), bound by masspolymerized polyurethanes.

## ACOUSTIC PERFORMANCES

PHYSICAL-MECHANICAL PERFORMANCES

| DESCRIPTION | M.U. | VALUE | TOLERANCES |
| :--- | :---: | :---: | :---: |
| Rubber density | $\mathrm{Kg} / \mathrm{m}^{3}$ | 750 | $\pm 7 \%$ |
|  |  |  | $\pm 10 \%$ |
| Rubber thickness | mm | 3 |  |
|  |  |  |  |

| DESCRIPTION | M.U. | VALUE | NORMS |
| :--- | :---: | :---: | :---: |
| Elongation percentage at break | $\%$ | 27 |  |
|  |  |  |  |
| Heat resistance | ${ }^{\circ} \mathrm{C}$ | Up to +80 |  |
|  |  |  | Up to -30 |
| Cold resistance | ${ }^{\circ} \mathrm{C}$ |  |  |
|  |  | B2 | DIN 4102 |
| Fire rating |  | 50 |  |
|  |  |  |  |
| SHORE A hardness |  |  |  |

CHEMICAL PERFORMANCES

| CHARACTERISTIC | PERFORMANCES |
| :--- | :--- |
| Chemical interactions | Highly resistant to acids and alkaline detergents, retains its characteristics <br> unchanged over time |
|  | Does not accumulate static charge and prevent interaction between materials |
| Electrostatic |  |
|  | $100 \%$ recyclable |
| Environmental sustainability |  |

## SPECIFICATION

Impact sound noises acoustic insulation obtained by carrying out a floating floor over a suitable de-coupling layer in elastic-resilient material laid after having carried out the levelling lightened screed.
The material is formed of a $750 \mathrm{~kg} / \mathrm{m}^{3}( \pm 7 \%)$ density mat made up of natural and synthetic elastomeric compounds, coming from the recycling of ELT (end of life tyres), bound by mass-polymerized polyurethane, 3.0 mm . thickness, with an attenuation rating index of impact sound noise pressure level of $\Delta L_{w}=20 \mathrm{~dB}$ load, dynamic rigidity equal to $88 \mathrm{MN} / \mathrm{m}^{3}$ and a 105 Hz resonance frequency such as ISOLNOISE AE 3 by VALLI ZABBAN.

## APPLICATION - FLOOR

After having installed the fixtures and the levelling with lightened screed, before the lodging screed

## APPLICATION METHOD

1. Decouple at the base all the vertical partitions (walls) with ISOLBAEND cut wall band.
2. Decouple the lightened screed from the wall with AEFLEX band.
3. Lay the acoustic insulation ISOLNOISE AE 3 over the lightened screed and all over the floor getting as near as possible to the wall. Seal the junction between the mats by overlapping the selvedge of the rolls margins and tape.
4. Carry out the complete decoupling of the floating screed from the external vertical partitions applying the AEFLEX adhesive band between ISOLNOISE AE 3 and the wall making all the overlaps.

## DIMENSIONS AND PACKAGING

| size | M.U. | VALUE |
| :--- | :---: | :---: |
| Thickness | mm | 3 |
|  | m | 1 |
| Roll height | m |  |
|  | $\mathrm{Kg} / \mathrm{m}^{2}$ | 15 |
| Roll length |  | 2,25 |
|  | piece |  |
| Weight per $\mathrm{m}^{2}$ |  | 16 |
|  | m |  |
| Number of rolls per pallet |  |  |
|  | cm | 240 |
| Total area per pallet |  |  |
|  |  |  |
| Pallet dimension |  |  |
